

ABSTRACT OF THE DISCLOSURE

INSULATING LABEL STOCK

5 An insulating label stock includes a thermal
insulating layer, which may a fiberfill batt. The batt
is laminated to at least one layer of film, paper or
fabric. The label stock can be wrapped around a
container, such as a can, bottle or pouch. The label
10 stock may be coated with a coating material so that it
is printable, thus imparting both insulating properties
and print capability to a container.
